

Forklift Electrical Part

Forklift Electrical Part - Forklifts may be purposely labeled to be used in unsafe places. A marked truck denotes the design has met the lowest requirements of ANSI/UL 558 meant for engine powered trucks or ANSI/UL 583 meant for electric trucks for the type of label placed.

The use for labels for lift forklifts can be found in National Fire Protection Association NFPA 505 - Powered Industrial lift trucks including: Type Designations, Areas of Use, and Maintenance and Operation. Check with your local insurance provider and Fire Marshall for further info about the approved uses of industrial powered forklifts in your application.

If the lift truck has been proven to meet the outlined standards, the following labels can be placed. A labeled truck will have the model designation put on the lift truck nameplate and would have one of the following labels attached.
