

JLG Forklift Parts

JLG Forklift Parts - In the late 1960's John L. Grove, with his wife Cora set out on a cross country excursion in their RV. Freshly retired, after spending many years working with his brother to manufacture their crane business into an industry leader, John had no idea that momentous trip would allow JLG Industries, Inc to emerge. The world leader of mobile aerial work platforms and precision material handling equipment was the end result of a road trip.

All through their journey, John reacquainted himself with past business associates along the way. In combination with these conversations and a significant event; two workers were tragically electrocuted on scaffolding when the Groves were passing through the Hoover Dam. John uncovered a vast marketplace for a product that could swiftly and securely lift individuals in the air to accomplish upkeep and other construction functions.

Upon returning from their travels, John established a joint venture with two friends and bought a metal fabricating company in McConnellsburg, Pennsylvania. In 1970, opening operations with a crew of twenty staff, they created and sold the first JLG aerial work platform. The business incorporates some of the basic design elements of that original lift into current designs.

JLG forklifts have come a long way from the time when Mr. John L. Grove returned to town from his cross-country road trip and since the first aerial work platform debuted on the market. Nowadays, the company proudly continues to expand itself into different marketplaces globally and develops new products to make certain consumers are capable of being more efficient and perform in the workplace within a safer environment.
